INTRODUCTION

TRAVELOG Tire brand specializes in the development, production, and sales of tires, primarily focusing on passenger car tires. Our extensive product line encompasses high-performance tires, SUV tires, off-road tires, and commercial vehicle tires to cater to the diverse needs of drivers worldwide.

At the core of TRAVELOG Tires lies performance and reliability. Through advanced manufacturing techniques and rigorous quality control measures, we ensure that each tire delivers exceptional handling stability, braking performance, and wear resistance. Whether navigating high-speed highways or tackling complex off-road terrains, TRAVELOG tires provide drivers with stable and dependable support for enhanced driving safety.

In terms of performance excellence, TRAVELOG Tires is dedicated to delivering superior overall capabilities. By optimizing tire structure and materials, we enhance fuel efficiency while reducing energy consumption during vehicle operation. Additionally, our focus on noise reduction employs cutting-edge technology to guarantee a quiet and comfortable driving experience. Furthermore, TRAVELOG Tires are designed for longevity; improvements in wear resistance and anti-aging properties offer drivers a more economical usage experience.

TRAVELOG Tire places great emphasis on teamwork, innovation, safety awareness, and market-oriented talent acquisition. By cultivating a highly skilled professional team, we ensure that individual customer needs are met with expertise while enhancing service delivery.

In summary, the TRAVELOG tire brand has garnered widespread recognition for its outstanding performance reliability coupled with excellent service standards. Moving forward, TRAVELOG Tires will steadfastly adhere to the development philosophy of 'quality first' combined with 'innovation-driven' strategies as we continue to develop and launch an array of high-performance tire products aimed at providing safer, more comfortable, and economically viable driving experiences for motorists around the globe.

TOUR ROUTE 1

The circuit board pattern design achieves real-time corresponding control changes and can sensitively start and stop on dry and wet roads to prevent water slipping.

Adopting four wide main grooves and dense cross grooves design, greatly improving drainage performance and enhancing the braking and handling performance of tires on wet and slippery roads.

Optimize the tread pattern and pitch arrangement design, effectively reduce the noise generated by the resonance of the tread with the air and road surface, and provide a quiet travel experience.

SPORT ROUTE 66

Outside 3-D lateral groove & kerf design reduces tire deformation at high speed also support great traction and good high-speed handling.

Multi tread radiuses design provide uniform footprint contact pressure, combine with outside tread block design to ensure tyre cornering response time and improve high-speed handling stability.

Optimized lateral groove & kerf design make wonderful hydroplaning performance, also support shorten wet braking distance.

CROSS ROUTE 10

Four wide main grooves design effectively drain accumulated water, providing excellent driving maneuverability on both dry and wet roads.

The new high silicon content tread formula and optimized tread contour design effectively increase the grounding area, reduce tire rolling resistance and improve wet slip resistance, improve handling accuracy and road feedback speed.

The continuous and hard central ribs design effectively improves the stability and handling response speed of high-speed driving.

CROSS ROUTE 50

Four wide circumferential tread grooves deliver the ride stability, Improved grooves and bead profile design.

Improve the grip while drain, and improve the stability performance under dry and wet condition.

The solid shoulder design enhance wet grip performance evacuation.

TERRAIN ROUTE A/T

All terrain pattern delivers superior traction for SUVs, pickups and vans both off on the road.

Reinforced biting edges on off-roads by strengthening block stiffness through a staggered solid center rib. Aggressive open shoulder tread design expels water, snow, slush and mud for optimum traction in all terrain conditions.

Multi directional sipe system for extra deep tread sipes at varying angles improve comfort without sacrificing traction.

CARGO ROUTE 20

Optimized sipe depth on center rib, to balance the block stiffness, ensure tyre high load and driving stability performance.

Solid shoulder block can improve the tyre load ability and prevent uneven wear ensure the tyre endurance performance.

With the new excellent wear resistance, high load tread rubber and optimized tread design, to ensure tyre long mileage performance.
